Targeted Investments 2.0 Program

NMDOH Dashboard Summary

Last Updated: October 28, 2026

The ASU TIPQIC team has developed several Tableau dashboards for the TI 2.0 program to help provider organizations improve their HEDIS® measure performance and support quality improvement efforts. This guide provides an overview of the Non-Medical Drivers of Health (NMDOH) G/Z Code Dashboard, which aligns with the TI 2.0 Program Years 3-5 milestones for documenting NMDOH screening and referral results through claims submission using G procedure codes (G9919 and G9920), the V4 modifier, and Z diagnosis codes. This dashboard will be updated monthly.

If you have any questions about dashboards, please email us at tipqic@asu.edu

To access the NMDOH G/Z Code Dashboard, visit data.tipqic.org and click the 'explore' button on the left. Open the "TIPQIC – TI 2.0 Provider Dashboards" folder and click the NMDOH G/Z Code Dashboard tile.

NMDOH G/Z Code Dashboard

This dashboard helps your provider organization monitor NMDOH G/Z code claim submissions.

Two views are offered: Definitions and Provider Summary

Definitions

This view defines all variables used in the 'Provider Summary' view, including screening outcomes identified by specific G codes and NMDOH domains identified by associated Z codes, such as education, employment, housing, food insecurity, and transportation.

TIPQIC NMDOH Coding Dashboard

TIP QIC Targeted Investments Program Quality Improvement Collaborative

Definitions

Screening Results:
- NMDOH Need Identified: G9919, G9919 + V4 modifier, or G9919 + Z139
- No Needs Identified: G9920

Patient Population
- **Pediatric:** Under 18 years old on the date of service
- **Adult:** 18 years old and older on the date of service
- **Justice:** Justice-involved patient referred to a TI 2.0 Justice provider

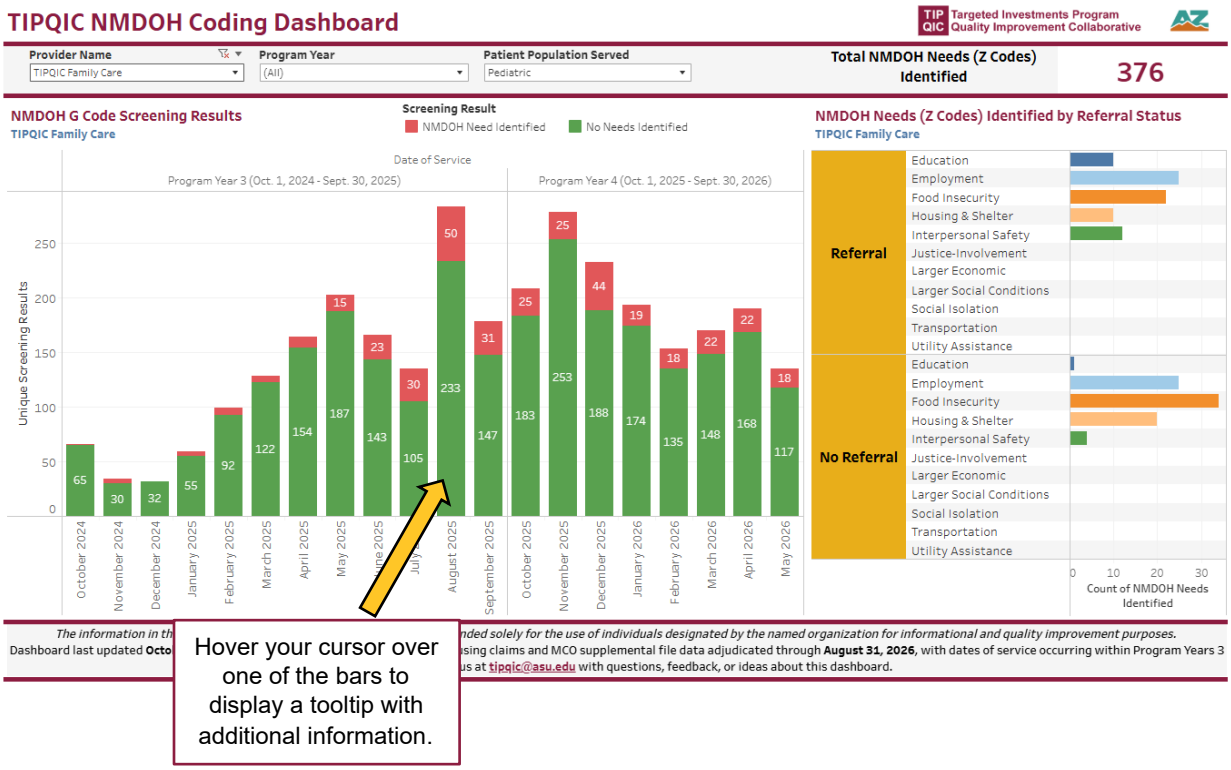

NMDOH Need Identified	Z Codes
Education	Z55, Z550, Z551, Z552, Z553, Z554, Z555, Z556, Z558, Z559
Employment	Z560, Z561, Z562, Z563, Z564, Z565, Z566, Z5681, Z5682, Z5689, Z569, Z570, Z571, Z572, Z5731, Z5739, Z574, Z575, Z576, Z577, Z578, Z579

Provider Summary

This view summarizes your organization's NMDOH G/Z code claims over the TI 2.0 Program Years. The "NMDOH G Code Screening Results" bar chart on the left shows the total number of unique G codes per patient for each date of service month, color-coded by whether an NMDOH need was identified. Among positive screens, identified NMDOH needs (Z codes) within your patient population are displayed on the right, stratified by referral status. The total number of identified NMDOH needs (Z codes), regardless of referral status, is shown in the top-right corner.

This dashboard is dynamic. Use the "Program Year" and "Patient Population Served" dropdowns to focus on a specific program year and/or patient population.

Hover your cursor over one of the bars to display a tooltip with additional information.
